

#1: Course Description

Successful completion of this course will prepare students for modeling simple real life quantitative problems with algebraic symbolism in order to analyze and solve the problem. Students will be able to manipulate the symbols to simplify expressions and translate the expressions into concrete English phrases. Students will be able to recognize when quantities have a linear relationship, model the situation with a function, and be able to apply these skills to problems in various fields such as business, geometry, chemistry and personal finance. Successful completion of this course will prepare students for MATH 112.

#2: Instructor Contact Information

Instructor: Michael Hoffman
Website: <http://my.smccd.edu>
Office Location: Building 18, 18-104
Office Phone: (650) 336-3346
Office Hours: TWTh 4:00-6:00pm
Email: hoffmanm@smccd.edu

#3: Required Materials

- My Math Lab Access Code
- Textbook: Lehmann, Jay. Elementary and Intermediate Algebra. Pearson.
- Calculator: Texas Instruments TI-84

To complete the homework assignments, you will need a code to access MyMathLab at www.coursecompass.com. This code is included with all new textbooks available in the College Bookstore, or can be purchased when you register for this course at www.coursecompass.com for \$80.00. This cost does not include a hard copy of the textbook, but it does include access to an online version of the textbook.

CourseID: hoffman83834

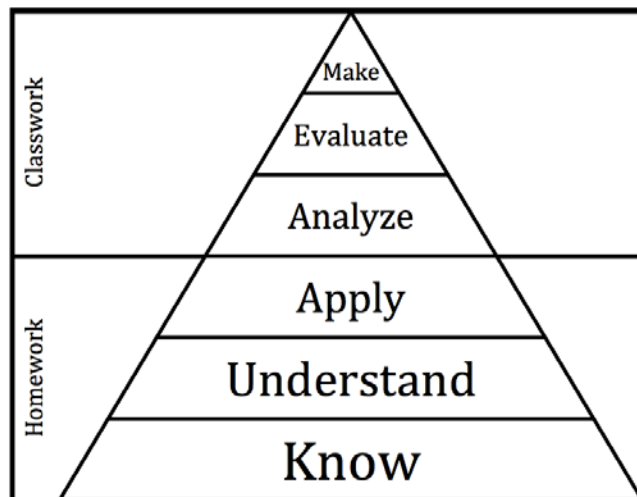

There are different versions of this book available from other vendors with codes that will not allow access to this course. It is important that you purchase the code either directly from Pearson at coursecompass.com or the college Bookstore.

#4: Important Dates

Last Day to Add/Drop (with partial refund): Friday August 31st
Labor Day: Monday September 3rd
Last Day to Drop (without refund, without record): Monday September 10th
Veteran's Day: Monday November 11th
Last Day to Withdraw: Friday November 16th
Final Exam: Wednesday December 12th
Project Presentations: Friday December 17th 11:10-1:40

#5: Classwork 10%

Each class you will be performing group explorations and presentations with classmates for approximately thirty minutes. This will be preceded by a ten-minute Q&A and followed by a ten-minute lecture. Presentations will be graded on the quality of collaboration and communication, with two points for each category for a sum of four points total. For the semester you are required to participate in seventeen group presentations, one for each week.

**#6: Homework 10%**

To help prepare you for these presentations, MyMathLab homework will be due each class morning. Each MyMathLab question has been painstakingly paired with an example in the textbook, the number of which can be found by pressing the "Instructor Tip" button or by consulting the homework schedule. MyMathLab questions completed after class will be worth 75% of their original value. **You Must Write Out Your Solutions to the Online Problems!** Paperwork for each MyMathLab question in a particular chapter is due the class after the chapter exam, so that you may review it. The paper homework will be graded on neatness and completion, with two points for each category for a sum of four points total.

#7: Exams 50%

Five chapter exams will be given during the semester. Make-up exams will not be given. Scores for missed exams will be generated from the cumulative final exam. The first missed exam will receive a score equivalent to the score in the final exam. Subsequent missed exams will receive a score equivalent to 80% of the score on the final exam. You will need to complete the "Key Points" assignment for each chapter as part of your exam and turn it in on the day after the exam.

#8: Cumulative Final Exam 20%

The final exam will take place on *Wednesday December 12th*. Any student who misses the final exam will receive a maximum grade of D for the course. You will need to complete the "Tips for Success" assignment as part of your final and turn it in on the day of the final.

#9: Data Modeling Project 10%

Your objective in this project is to use Excel to find a function that can be used to model an authentic situation. Your first task will be to find data that follows a pattern. Almanacs, newspapers, magazines, and scientific journals are good resources. You may want to try an Internet search, or you can conduct an experiment. Choose something that interests you! Your finished result will be a PowerPoint consisting of at least six slides (1) Data Source and why it's significant (2) Variable Definition and Data Table (3) Scattergram with Regression Equation (4) Prediction or Estimate for an Output (5) Prediction or an Estimate for Input (6) Conclusion. If you work in a group, each member must present at least one slide. If you work in a group, each member must present at least one slide. These PowerPoints will be presented on Monday December 17th from 11:10 to 1:40.

Speaking of group projects, this class would not be possible without John Chavez, Jarrod Feiner, Jon Freedman, Rick Hough, David Hasson, Denise Hum, Evan Leach, Vanson Nguyen, and Soodi Zamani.

"Education is not the filling of a pail, but a lighting of a fire."

#10: Tentative Schedule of Topics:

| Week | Day | Date | Topics / Deadline | Text |
|------|-----|--------|---|-----------------|
| 1 | Mon | 20-Aug | Introductions | Handouts, Video |
| | Wed | 22-Aug | Variables, Constants and Number Lines | 1.1 |
| 2 | Mon | 27-Aug | Graphing Data: Scattergrams | 1.2 |
| | Wed | 29-Aug | Linear Relationships and Modeling | 1.3 |
| 3 | Mon | 3-Sep | Labor Day: No Class | |
| | Wed | 5-Sep | Approximate Linear Relationships | 1.4 |
| 4 | Mon | 10-Sep | Review Chapter 1, Projects | Handouts |
| | Wed | 12-Sep | Chapter 1 Exam | EXAM |
| 5 | Mon | 17-Sep | Creating, Evaluating Algebraic Expressions | 2.1 |
| | Wed | 19-Sep | Fractions | 2.2 |
| 6 | Mon | 24-Sep | Adding Positive and Negative numbers | 2.3 |
| | Wed | 26-Sep | Change in a quantity: Subtraction | 2.4 |
| 7 | Mon | 1-Oct | Ratios, Percents, Multiplication and Division | 2.5 |
| | Wed | 3-Oct | Exponents and Order of Operations | 2.6 |
| 8 | Mon | 8-Oct | Review Chapter 2, Projects | Handouts |
| | Wed | 10-Oct | Chapter 2 Exam | EXAM |
| 9 | Mon | 15-Oct | Graphing $y = mx + b$ | 3.1 |
| | Wed | 17-Oct | Linear Models | 3.2 |
| 10 | Mon | 22-Oct | Slope of a line | 3.3 |
| | Wed | 24-Oct | Graphing $y = mx + b$ with Slope | 3.4 |
| 11 | Mon | 29-Oct | Rate of Change | 3.5 |
| | Wed | 31-Oct | Rearranging Terms in Expressions | 4.1 |
| 12 | Mon | 5-Nov | Review Chapter 3, Projects | Handouts |
| | Wed | 7-Nov | Chapter 3 Exam | EXAM |
| 13 | Mon | 12-Nov | Veterans Day: No Class | |
| | Wed | 14-Nov | Simplifying Expressions | 4.2 |
| 14 | Mon | 19-Nov | Solving Equations | 4.3 |
| | Wed | 21-Nov | More Solving Equations | 4.4 |
| 15 | Mon | 26-Nov | Equations vs. Expressions | 4.5 |
| | Wed | 28-Nov | Finding Lines through two points | 5.4 |
| 16 | Mon | 3-Dec | Review Chapter 4, Projects | Handouts |
| | Wed | 5-Dec | Chapter 4 Exam | EXAM |
| 17 | Mon | 10-Dec | Cumulative Review | |
| | Wed | 12-Dec | FINAL EXAM | EXAM |
| 18 | Mon | 17-Dec | Project Presentations | Last Class |

“Education is not the filling of a pail, but a lighting of a fire.”

#11: List of Section Objectives:

| SECTION | EXAMPLE | DESCRIPTION | EXERCISES |
|---------|--|---|-----------------|
| 1.1 | 1 | Using a Variable to Represent a Quantity | 5, 9 |
| | 3 | Comparing Constants and Variables | [23] |
| | 4 | Graphing Integers on a Number Line | 29 |
| | 5 | Graphing Real Numbers on a Number Line | 35 |
| | 8 | Graphing Data and the Mean | 69, 71 |
| 1.2 | 2 | Determining the Meaning of an Ordered Pair | 29, [32], 34 |
| | 4 | Creating a Scattergram with Age Groups | [47] |
| | 7 | Reading a Bar Graph | 52 |
| | 8 | Plotting Points | 1,11,13,[15],39 |
| 1.3 | 2 | Making Estimates and Predictions | [21], 23 |
| | 3 | Deciding whether to Use a Line to Model Data | 19, [33] |
| | 4 | Finding Intercepts and Coordinates | [1], [3], [6] |
| | 5 | Finding Intercepts of a Linear Model | 15 |
| | 6 | Using a Linear Model to Make Estimates | [27], 28 |
| 1.4 | 1 | Using a Line to Model Data | [3] |
| | 2 | Making Estimates and a Prediction | 11 |
| | 4 | Finding Intercepts of a Model | 1 |
| 2.1 | 5 | Finding and Evaluating an Expression | 17, 19, 21, 22 |
| | 7 | Translating from English to Mathematics | 25, 28, 29, 31 |
| | 8 | Translating from Mathematics to English | 33 |
| | 9 | Evaluating an Expression in Two Variables | 57 |
| 2.2 | P.63 | Division by Zero | 59 |
| | P.63 | Dividing a Number by 1 | 57 |
| | P.63 | Dividing a Nonzero Number by Itself | 55 |
| | 1 | Finding the Product of Two Fractions | 23 |
| | 2 | Writing a Number as a Product of Primes | [5] |
| | 4 | Simplifying a Fraction | 21 |
| | 6 | Finding the Quotient of Two Fractions | 33 |
| | 7 | Evaluating an Expression | [69] |
| | 8 | Adding Fractions with the Same Denominator | 35 |
| 9 | Adding Fractions with Different Denominators | 45 | |
| 2.3 | 1 | Finding Opposites | 3 |
| | 2 | Finding Absolute Values of Numbers | 11 |
| | 4 | Finding the Sum of Two Numbers with the Same Sign | 15 |
| | 6 | Finding the Sum of Two Numbers with Different Signs | 13, 19, [45] |
| | 7 | Translating from English to Mathematics | 61 |
| | 8 | Applications of Adding Real Numbers | [71], 73 |
| | 9 | Finding and Evaluating an Expression | 75 |
| 2.4 | 2 | Finding Changes in a Quantity | 62 |
| | 4 | Finding Differences in Real Numbers | 1 |
| | 5 | Subtracting a Negative Number | 55 |
| | 6 | Subtracting a Negative Number | 23, 29 |
| | 7 | Translating form English to Mathematics | 83 |
| | 8 | Finding a Change in Elevation | [59] |
| | 10 | Finding an Expression Describing Change | 65 |

| SECTION | EXAMPLE | DESCRIPTION | EXERCISES |
|---------|---------|-------------|-----------|
|---------|---------|-------------|-----------|

“Education is not the filling of a pail, but a lighting of a fire.”

| | | | | |
|-----|-----|---|--------------------------------------|---------|
| 2.5 | 1 | Finding a Unit Ratio | 101, 103 | |
| | 3 | Converting Percentages and Decimal Numbers | 1, 3, 9 | |
| | 4 | Finding the Percentage of a Quantity | 11, 13 | |
| | 8 | Application of Multiplying Real Numbers | [109] | |
| | 10 | Application of a Ratio of Two Real Numbers | [107] | |
| | 11 | Simplifying Fractions and Adding Fractions | [73] | |
| 2.6 | 1 | Calculating Expressions that Have Exponents | 1, 5, 7, 9 | |
| | 2 | Performing Operations | 13 | |
| | 3 | Performing Operations | 59 | |
| | 5 | Evaluating an Expression | 77 | |
| | 6 | Evaluating Expressions | [81], 67 | |
| | 7 | Using a Table to Find an Expression | [87] | |
| | 3.1 | 1 | Identifying Solutions of An Equation | [1] |
| 2 | | Plotting Some Solutions of an Equations | 19 | |
| 3 | | Graphing an Equation | 21 | |
| 4 | | Graphing an Equation | 27 | |
| 5 | | Describing Solutions by Using the Rule of Four | 9 | |
| 3.2 | 1 | Using a Linear Model to Make Predictions | [5] | |
| | 2 | Using a Linear Model to Make a Prediction | [8] | |
| | 3 | Finding and Graphing a Linear Model | [19] | |
| | 4 | Graphing an Equation of the Form $y=b$ | 25, 46 | |
| | 5 | Graphing an Equation of the Form $x=a$ | 21, 27, 43 | |
| 3.3 | 1 | Comparing the Steepness of Two Roads | 3 | |
| | 2 | Finding the Slope of a Line | 5 | |
| | 3 | Finding the Slope of a Line | 11 | |
| | 5 | Finding the Slope of a Line | 15, 27, 33 | |
| | 6 | Finding the Slope of a Line | 39, 41 | |
| | 8 | Finding the Slope of a Horizontal Line | 35 | |
| | 9 | Finding the Slope of a Vertical Line | 37 | |
| 3.4 | 1 | Sketching a Line | 3 | |
| | 4 | Graphing an Equation | [23] | |
| | 5 | Graphing a Model's Equation | 47 | |
| | 6 | Interpreting the Signs of m and b | 51 | |
| | 7 | Finding an Eqn. of a Line from Its Slope and y -Intercept | 60, 61 | |
| | 8 | Finding an Equation of a Line from Its Graph | 65, [66] | |
| | 9 | Find the Slopes of Two Parallel Lines | 70 | |
| | 10 | Find the Slopes of Two Perpendicular Lines | 67 | |
| | 3.5 | 1 | Finding Rates of Change | 1, 3 |
| | | 2 | Finding Rates of Change | [5], 11 |
| 3 | | Comparing the Slope with a Rate of Change | [31] | |
| 4 | | Finding a Model | [15] | |
| 5 | | Finding a Model | 23, | |
| 6 | | Analyzing a Model | 25, 26 | |
| 10 | | Finding an Equation of a Line | [41] | |

| SECTION | EXAMPLE | DESCRIPTION | EXERCISES | |
|---------|---------|---|---|--------|
| 4.1 | 2 | Using the Associative Law | 1 | |
| | 4 | Using the Distributive Law | 9, 19 | |
| | 6 | Using the Distributive Law | 21 | |
| | 7 | Evaluating Expressions | 53 | |
| | 8 | Simplifying Expressions | 27 | |
| | 9 | Translating from English to Mathematics | 61 | |
| | 10 | Simplifying an Expression | 39 | |
| | 11 | Simplifying an Expression | 41 | |
| | 12 | Sowing That a Statement is False | [65] | |
| 4.2 | 1 | Combining Like Terms | 1, 3, 8 | |
| | 2 | Simplifying Expressions | 17, 37, 35 | |
| | 3 | Translating from English to Mathematics | 53, 55 | |
| | 4 | Translating from Mathematics to English | 61, [63] | |
| 4.3 | 1 | Identifying Solutions of an Equation | 1 | |
| | 2 | Solving an Eqn. by Adding a Number to Both Sides | 11 | |
| | 3 | Solving an Eqn. by Subtracting a Number from Both Sides | 9 | |
| | 4 | Solving an Eqn. by Multiplying Both Sides by a Number | 31 | |
| | 5 | Solving an Eqn. by Dividing Both Sides by a Number | 23 | |
| | 6 | Solving an Eqn. by Multiplying Both Sides by -1 | 29 | |
| | 7 | Solving an Eqn. by Multiplying Both Sides by a Number | [37] | |
| | 8 | Solving an Eqn. in One Variable by Graphing | 51, [53] | |
| | 10 | Solving an Eqn. in One Variable by Using a Table | 63 | |
| | 4.4 | 1 | Using the Addition and Multiplication Properties of “=” | 1 |
| 2 | | Combing Like Terms to Help Solve an Equation | 9 | |
| 3 | | Solving an Eqn. with Variable Terms on Both Sides | 13 | |
| 4 | | Using the Distributive Law to Help Solve an Eqn. | 17 | |
| 5 | | Solving an Eqn. That Contains Fractions | 28 | |
| 6 | | Solving an Eqn. That Contains Fractions | 37 | |
| 8 | | Making Predictions | [50] | |
| 9 | | Translating an English Sentence to an Equation | 53, 55, 57, 59 | |
| 10 | | Translating an Equation to an English Sentence | 63, 65, 67 | |
| 11 | | Solving an Eqn. in One Variable by Graphing | 79, 85 | |
| 12 | | Solving an Eqn. in One Variable by Using a Table | [69] | |
| 14 | | Solving Three Types of Equations | 95, [97], [99] | |
| 4.5 | | 1 | Simplifying an Expression and Solving an Equation | 9, 11 |
| | | 3 | Comparing Expressions and Equations | 17, 19 |
| | 4 | Comparing Expressions and Equations | 39, [43] | |
| | 5 | Translating from English to Mathematics | 59, 61, 63, 67 | |
| 4.6 | 1 | Using the Area Formula of a Rectangle | 17 | |
| | 2 | Using the Perimeter Formula of a Rectangle | 19 | |
| | 3 | Total-Value Formula | 29 | |
| | 5 | Solving a Formula for One of Its Variables | 41 | |
| | 7 | Writing a Linear Equation in Slope-Intercept Form | 63, 59, [61], 65 | |
| | 9 | Solving a Linear Model for One of Its Variables | 72 | |
