

Find the perimeters of the following figures by measuring ONLY FOUR SIDES of each figure. Measure using the accuracy given in the problem, and clearly state which 4 sides you are measuring and what their lengths are.

1. Measure four sides to the nearest quarter inch, then use your measurements to find the perimeter.

- (a) First side and its length: _____
- (b) Second side and its length: _____
- (c) Third side and its length: _____
- (d) Fourth side and its length: _____
- (e) Perimeter: _____

2. Measure four sides to the nearest eighth inch, then use your measurements to find the perimeter.

(a) First side and its length: _____

(b) Second side and its length: _____

(c) Third side and its length: _____

(d) Fourth side and its length: _____

(e) Perimeter: _____
