Math 130 Trigonometry
Fall 2006

Instructor: Cindy Moss
E-mail: moss@smccd.edu
Website: http://www.smccd.net/accounts/moss/
Office: 7117B
Phone: 738-4413
Fax: 738–4299

Office hours: Mon 10–11, Tu, 11–12, 5–6, Wed 10–11, Fri 10–11

Text: Analytic Trigonometry with Applications, 9th edition by Barnett, Ziegler, Byleen
Required: TI-83 or 84 (Plus) Calculator

Attendance and Participation: Attendance to all class sessions is required. After 4 absences your grade may be lowered or you may be dropped from the class; however, it is your responsibility to officially drop the course should you decide to do so otherwise you may receive an F.

Exams: 60% There will be approximately 6 exams and your lowest exam score will be dropped. Exam dates will be announced in advance. No make-up exams will be given, if you miss an exam that will count as your dropped score. To get a C in this class you must have 70% average on the exams and final.

Homework and Quizzes: 15% Homework will be assigned daily and collected on exam days. Please follow the homework grading policy guidelines to get full credit. No late homework will be accepted. Quizzes will be similar to the homework.

Final Exam: 25% The final exam will be cumulative and you must earn at least 50% to pass this course. Check the schedule of classes for the final exam day and time.

Grading Scale: 100% - 90.0% = A, 89.0% - 80.0% = B, 79.0% - 70.0% = C, etc.

Tutoring: The Learning Center, located on the first floor in building 5, provides free tutoring. It is a great place to go for doing homework and forming study groups.

Cheating: Do not cheat!! Skyline’s policy is outlined in the college catalog. If you are caught sharing a calculator, pencil, eraser, or anything during an exam or quiz you will receive a score of zero. Also, at no time cell phones are allowed to be on during class. If your phone rings during a graded assignment you will receive a score of zero.

Final Thoughts: Turn off pagers and cell phones before you come to class. Do not talk except for class discussions. If you do, I will ask you to stop, and if you continue, I will tell you to leave. You are here to learn mathematics, and I am here to teach you. I expect you to demonstrate courtesy and consideration toward your peers and the instructor. If you arrive late, enter quietly and take a seat near the door. If you need to leave early, sit near the door and leave quietly. I recommend that you keep all your work and exams until you receive your course grade in case you have questions concerning your class performance. If you have any special needs, please talk to me or visit the DSPS office.
