

Lesson Structure

Math 120 Online

Online homework is found MyOpenMath. Each assignment has a due date but it is a good idea to work ahead. You may repeat homework and quizzes as many times as you like until the deadline. If you procrastinate to the deadline you run the risk of not being able to complete the assignment. If you are working on the assignment just before the deadline and there is a problem with MyOpenMath then you will not be able to complete the assignment. If you feel that MyOpenMath is not recording your answer correctly send me an email with the section and problem number and I will look at it.

Written homework is in the text book and is due on exam days but in order to be successful in this class you must do homework daily. The assignments are on the Unit Checklist. Do not wait until the last minute to do your homework; it does not work. Follow the structure found on the Sample Written Homework document. Plan on spending between ten and fifteen hours per week on this course.

Typical Unit Tasks

- Download the Unit Checklist to guide you through the tasks for the unit
- Preview my lecture notes found on the MyOpenMath
- Watch the video lesson found on MyOpenMath
- Use the Forum to ask questions and make comments about the material
