

## **Math 150 Online Lesson Structure**

The Modules are a workbook style. You will turn in the completed Modules on the exam day and it will be part of the graded homework. Do all your work in the Module not on separate paper. All the answers to the Module exercises are provided.

Written homework is found at the end of each Module and is due on exam days but in order to be successful in this class you must do homework daily. Do not wait until the last minute to do your homework; it does not work. Follow the structure found on the Sample Written Homework document. Plan on spending between 9 – 12 hours per week on this course.

Online homework is found in MyOpenMath under Online Homework. Each assignment has a due date but it is a good idea to work ahead. Some assignments are algorithmic and can be attempted unlimited times and others are static and have only one attempt. Your lowest online homework score will be dropped. If you procrastinate to the deadline you run the risk of not being able to complete the assignment.

Forum assignments are graded and the due dates are on the Unit Checklists.

There will be writing assignments which can be found on MyOpenMath under the Writing Assignments folder.

## **Typical Unit Tasks**

- Download the Unit Checklist to guide you through the tasks for the unit
- Work through the Modules
- Preview the lecture videos found on MyOpenMath
- Use the discussion forum to ask questions and make comments about the material
- Attend the Virtual Classroom sessions
- Do the online homework
- Complete the written homework from the back of each Module
- Complete the writing assignment
